CAD IT ANNOUNCES THAT IT WILL BE ATTENDING THE NEXT SMAU IN PADUA

CAD IT, an envoy of business competition for 35 years, announces that it will be attending the SMAU in Padua at the Fujitsu Village on the 18th and 19th of April.

During the 2-day event, CAD IT will be presenting its services and software solutions: Infor Lawson M3, international ERPs for large industrial companies, and Sigmaweb, enterprise ERPs for small and medium-sized companies.

Infor Lawson M3 Enterprise is the international ERP designed to manage all large industrial company processes. With more than 4,500 customers in 40 countries, M3 Enterprise provides integrated instruments for managing a company's "core" processes: from finance to relations with the clientele, from production to the supply chain. M3 Enterprise is up and running in Italy in national and international large-sized companies and is being used by some leading companies in the food, chemical and pharmaceutical, fashion, plastic, packaging and machinery maintenance and rental sectors.

Sigmaweb is a modular and flexible ERP solution designed to manage all the organisational and productive aspects of small to medium-sized companies. It targets production, commercial and service companies with hundreds of customers throughout Italy. Accessible by means of browsers, even on demand, Sigmaweb supports the following activities: finance, assets and liabilities, production, scheduling, logistics and commercial management.

THE CAD IT GROUP

CAD IT, founded in 1977, is one of the most dynamic organizations in the Italian Information Technology sector and is leader in the Italian software market for business, banking, insurance and public administration.

Listed on the Milan Stock Exchange since 2000, CAD IT offers software solutions, maintenance, customising, integration and other correlated services from application management to outsourcing and consultancy to training.

The CAD IT Group has successfully capitalised its strategic advantage by applying the right policies in terms of acquisitions and partnerships and by making considerable investment in research and development through which the company has been able to create software solutions and highly specialised innovative services.

The Group has solid relations with over 200 client companies and boasts a staff of over 600 collaborators who are trained to provide customer support during strategic changes. The aim is to supply know-how and advanced technology and produce tangible results in terms of costs and within sustainable and measurable time periods.

CAD IT customers using ERP solutions like Sigmaweb are small and medium-sized companies while the Infor Lawson M3 application is ideal for large-scale international companies.

The CAD IT Group, with head offices in Verona, operates in Italy through its own branches and associated companies in Milan, Rome, Prato, Bologna, Padua and Mantua.
